DETAILED ACTION

Election/Restrictions

Claims 3-15 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected claimed subject matter, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 09-30-05.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 15, applicant should clarify what is intended by "through an adhesive."

In claim 2, line 16, applicant should clarify what is intended by "through an adhesive."

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over] JP 11-54326 in view of Matsuta et al. [US 2003/0076211].

JP 11-54326, as best understood in view of the rejections under USC 112, 2nd paragraph, disclose a coil device comprising:

- a first magnetic substrate [3];
- a multi-layer coil part [7] in that electrically insulating layers [6] and coil patterns [5] formed alternately on the first magnetic substrate with the multi-layer coil part avhing a central portion [16] surrounded by the coil patterns and an outer removal pattern[18] at where the electrically insulating layers corresponding to outer circumferential regions of coil patterns are removed; and
- a second magnetic substrate [10] connected to the uppermost coil layer via an adhesive [8].

JP 11-54326 disclose everything claimed except a magnetic powder containing region provided on an electrically insulating layer on the uppermost one of the coils and the coil being used in a choke coil.

Matsuta et al. discloses a choke coil [paragraph 2] formed of alternating insulating and coil layers [11, 12-13, figure 2] sandwiched between upper and lower magnetic substrates [1, 2] with a layer formed of magnetic power on an insulating layer on the uppermost coil layer [paragraph 81].

It would have been obvious to one of ordinary skill in the art at the time the invention was made to include a layer formed of magnetic power on an insulating layer

Art Unit: 2832

on the uppermost coil layer of JP 11-54326 in order to control the permeability of the device.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lincoln Donovan whose telephone number is 571-272-1988. The examiner can normally be reached on M-F 8-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Enad Elvin can be reached on 571-272-1990. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
